The last issue of *Currents*, the journal of NMEA featured articles on deep sea corals.
Read this interesting email and request for support of statement against deep sea fishing practices.

Who: Teachers of Grades 6-12 Interested in Ocean Exploration **What:** NOAA Ocean Exploration Professional Development: Learning Ocean Science through Ocean Exploration, Introduction to the Curriculum Session **When:** Saturday, September 24, 2005, 9:00 a.m. – 3:00 p.m. **Where:** South Carolina Aquarium, Charleston, SC

From bioluminescent corals to deep vent worms we know more about the Moon than our ocean. Bring the excitement of current ocean science discoveries to your students using the Ocean Exploration curriculum and a CD-ROM of the Ocean Explorer Web site (<<http://oceanexplorer.noaa.gov>>) from the National Oceanic and Atmospheric Administration (NOAA). Join South Carolina Aquarium educators during the first session as you do inquiry- and standards-based activities tied directly to NOAA ocean expeditions. A copy of *Learning Ocean Science Through Ocean Exploration* and the companion CD-ROM will be provided. Registration is required and space is limited. Stipend, per session, offered by NOAA's Office of Ocean Exploration. Six renewal credits available. Please contact Katrina Bryan at 843.579.8546 or kbryan@scaquarium.org if you would like to attend. The professional development is limited to a total of 24 participants. Deadline for registration is September 22, 2005.

Are you familiar with the REVEL Project? Organized by the University of Washington School of Oceanography and funded by NSF, this program brings teachers out on oceanographic research expeditions as participants/assistants in the research. By the end of our nearly 3-week ocean voyage, each of us will have taken on our own research project and presentation. There are 4 teachers this year, and we are all extremely excited. Friday our part begins, with a seaplane transfer for the R/V Thomas G. Thompson. The mission website is <http://www.ocean.washington.edu/outreach/revel/> and it should "go live" in the next few days. Send your questions, ideas, or sea-related poetry.
